1 Main

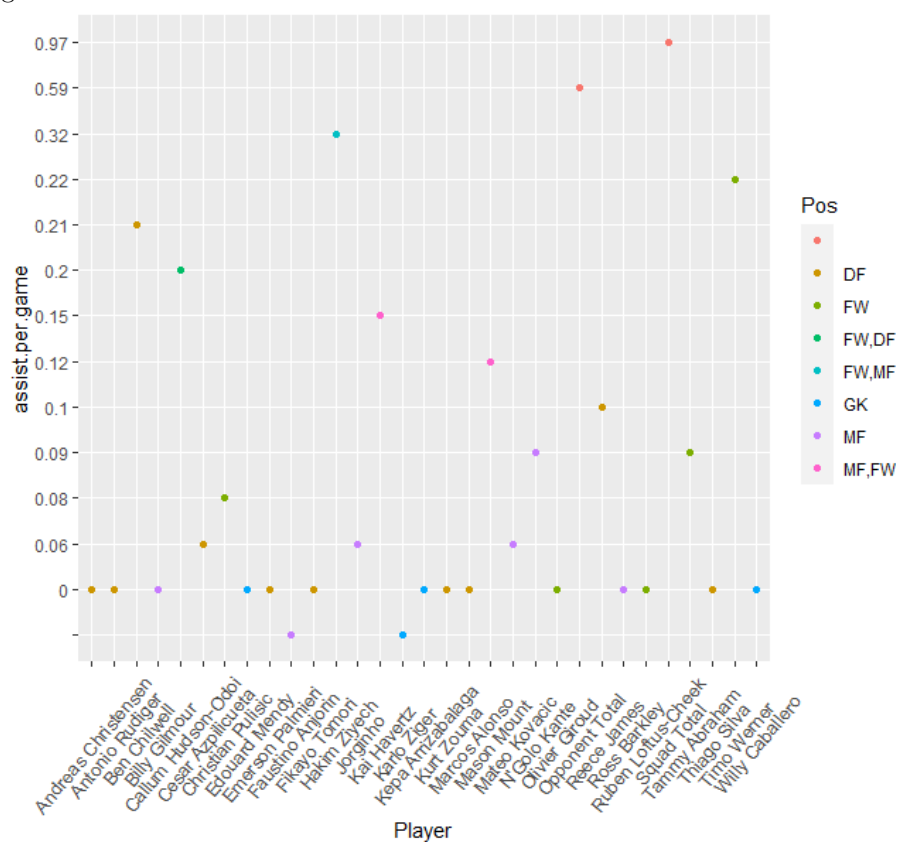

For these files, I downloaded them as Excel Workbooks, then went into Excel and changed the titles to be more coherent. I then went into R and deleted duplicate rows and unnecessary columns. I didn't do much to transform the data, as it was already in a clean state. For future analysis, I'd add a log option for Goals and Assists.

The below graphic is showing goals per game by player, within the Premier

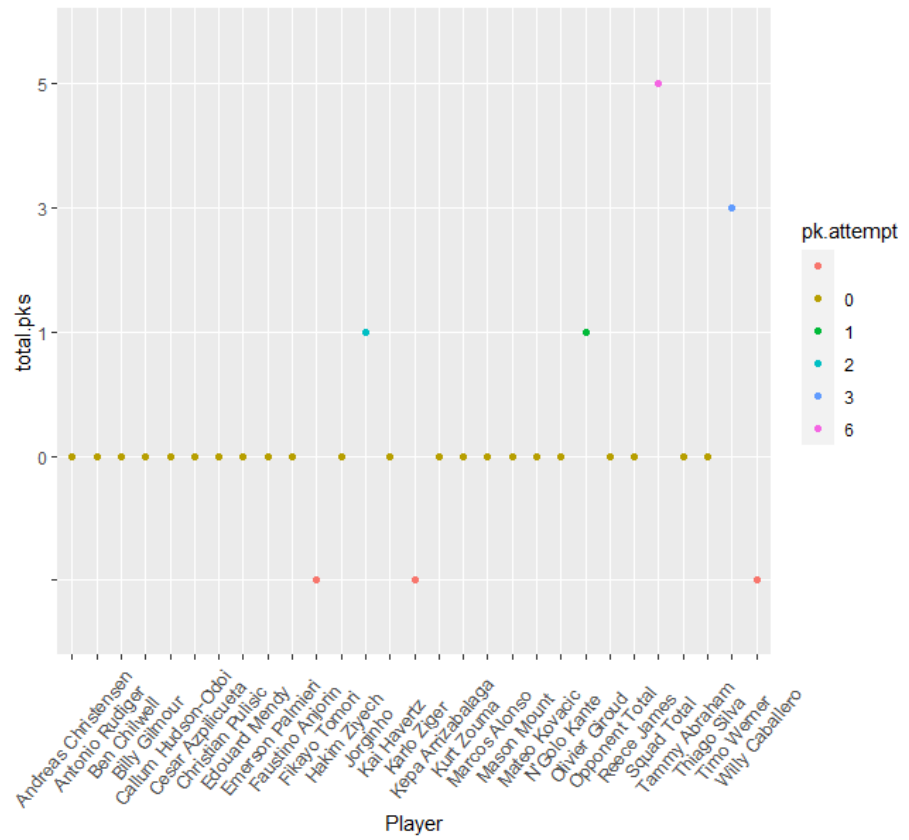

League.

This graphic indicates the number of assists per game, within the Premier League.

This graphic shows the number of PK's scored by player, with color coding

for attempts, within the UCL.

These graphics are crucial for the point of this research, regarding player performance within one team, Chelsea, throughout different domestic and international competitions.
