1 Introduction

Below is my itemized section covering the main tools of a data scientist.

2 Body

The following are the core statistical programming languages within the Data Science pipeline

1. R
2. Julia
3. Python

Spark, Hadoop, and SQL are key for working with larger datasets that would be impossible for individual laptops and desktops.

Tableau is a helpful visualization software as well.

1. Tableau

3 Conclusion

There are no shortage of tools within the data science pipeline, just a matter of becoming proficient in them all.
